

JBN 'S TIMELINE

1995 - JBN began setting up a non invasive cardiac diagnostic centre to complement their busy internal medicine practice.

1996 - Addition of echocardiography to cardiac diagnostic range.

1997 - Expansion to on site specimen collection and some lab processing before the shipment for analysis.

1998- First clinical trial conducted at JBN.

2000 - Large expansion of the diagnostic division. Implementation of numerous satellite holter monitor testing sites.

2002 - Expansion of clinical trials to research division.

2002 - Development of specialty health clinics: memory and bone health.

2002 - After moving to a new facility to accommodate the rapid growth of the clinic, JBN converted to electronic medical records with the gradual elimination of paper charts.

2003 - JBN became fully electronic throughout the entire clinic. EMR has allowed us to provide better patient care by expediting diagnostic results and consultation reports to referring physicians within 24 hours.

2003 - Further development of specialty health clinics in collaboration with other vascular centers in London, Cambridge and Hamilton.

2004 - Development of special public education forums (PEF'S) free to all patients and the general public. Aimed at addressing specific health problems, including: Bone Health, Memory Health, Vascular and Diabetic Health, Healthy Weight Clinic and Asthma Clinic.

2004 - Healthy Weight Clinic -Pounds For Health developed. Ran by registered dietitian in collaboration with internal medicine physician supervision.

2006 - Development of The Canadian Bariatric Clinic (CBC) Obesity and Cardiovascular Treatment and Research Centre at JBN Medical. The clinic's goal is to improve health, by decreasing cardiovascular risk factors, such as high blood pressure, diabetes and improving the knowledge base of obese patients to enable them to implement strategies to deal with their obesity.

2007 - Addition of special bariatric equipment for cardiovascular testing to JBN diagnostics department. Recumbent bike and new ultrasound equipment, with specialized technician training allowing for superior technical quality of cardiovascular testing on obese patients.

2008 - Expansion of the Pounds for Health clinic.

2009 – Addition of nutritional counseling, smoking cessation and diabetic teaching clinics.

2010 – Further development of BEST, Bariatric Educational Sessions and Treatment to complement our obesity clinic services.
